MACHINERY

客户的需求和满意，
是我们不懈的创造和追求！

*Customer's need and satisfaction is what
we are constantly creating and pursuing.*

WELCOME TO REIZE !

**From pellet to packed bag.
One factory, one complete line.**

**从一粒料，到一只成品袋。
一个工厂，为你提供一整条生产线。**

- ① 方便的操作
- ② 耐用性
- ③ 出色的性价比
- ④ 及时的售后服务

- Convenient operation
- Durability
- Excellent value for money
- Timely service

欧盟认证企业 / 国家高新技术企业
CE Certified Enterprise
National High Technology Enterprise

Founded in 1997, Reize started out as a specialist manufacturer combining automation and electrical engineering with flexible packaging machinery. Its products include a full range of side-seal and bottom-seal bag making machines, along with matching servo control systems. In 2010 the company began developing and manufacturing blown film machines. It now builds 3- to 11-layer co-extrusion blown film lines for food, personal care, household product and barrier packaging, as well as other printed and laminated flexible packaging. After years of development, its products have reached a consistently high standard of quality. They sell well in China and abroad, and the company is well known among customers and across the industry.

CHINESE BRAND
SGLOBAL STAGE

中国智造，布局全球

锐泽市场辐射全球20+个国家及地区，国内34省市场全面覆盖。目前仍在持续开拓中。

REIZE market radiates to over 20 countries and regions worldwide, with full coverage of the 34 provincial markets in China. Still continuously expanding.

REIZE'S FIVE CORE COMPETITIVENESS

1. 强大的研发实力

公司拥有多项专利证书，研发能力突出，持续推动技术创新与产品升级。

2. 稳定的海内外供应链保障

与海内外高端核心部件供应商建立长期紧密的深度合作关系，从源头确保产品品质达到国际领先水平。

3. 深厚的行业积淀

30年行业发展历程，服务全球多家大型软包装企业，以卓越口碑与专业服务赢得客户信赖。

4. 高效的生产能力

配备7000平方米标准化装配车间，严格把控品质，保障产品准时交付，满足客户多样化需求。

5. 全球化售后网络

我们在马来西亚、斯里兰卡、菲律宾均设有本地工程师团队，可快速响应全球服务需求，快速抵达现场提供安装、维修服务，保障设备持续运行。

1. Strong R&D capability

With multiple patent certifications, our company demonstrates outstanding research and development capabilities, continuously driving technological innovation and product upgrading.

2. Stable high-end supply chain assurance

Long-term, close and in-depth partnerships with overseas and domestic suppliers of high-end core components ensure that product quality meets international leading standards from the source.

3. Profound industry expertise

With 30 years of industry experience and serving many large global flexible packaging enterprises, we have earned customer trust through excellent reputation and professional services.

4. Efficient production capacity

Equipped with a 7,000-square-meter standardized assembly workshop, we strictly control quality and ensure on-time delivery of products to meet diverse customer needs.

5. Global After-sales Network

With local engineer teams based in Malaysia, Sri Lanka, and the Philippines, we offer rapid response services worldwide. Our technicians can arrive on-site within 72 hours for installation and maintenance, ensuring continuous operation of your equipment.

REIZE
MACHINERY

PAPER CORE CUTTING MACHINE

DJ-1600纸芯切割机

手动装载，用于管材切割，该机器的长度可以定制，标准机器适用于3英寸内径纸芯，6英寸作为可选适配器，其他直径需要根据情况进行讨论。也可以尝试管壁厚度小于6mm的PVC/PP/PE管子，这需要提前测试。它由PLC控制，设置所需长度和数量后自动切割，得到预设长度的管子，节省大量的时间和精力。

可定制:

- 工作宽度
- 纸芯内径
- 电源电缆插头

↔

工作宽度
Working Width

mm

Loaded by hand, for cutting tube. The length of the machine can be built to order, and the standard machine takes paper cores with a 3 inch inside diameter; 6 inch is an optional adapter. Other diameters have to be discussed case by case. PVC/PP/PE tube with a wall under 6 mm can be tried as well, but it has to be tested first. It is PLC controlled: set the length and the quantity you need and it cuts on its own, so you get tube at the preset length and save a lot of time and effort.

Built to order:

- Working width
- Core inside diameter
- Mains plug

AUTOMATIC DRAWSTRING BAG PRODUCTION LINE

G-1000自动穿条连卷袋制袋机

该机由5部分组成，彼此相互连接，采用最先进的欧姆龙PLC和以太网通讯来实现对产品的高效率高品质控制。

生产线包括：

- 主膜放卷，穿条上料，双烫头制袋，三角对折和重叠式收卷；
- 先进的人机操作界面覆盖整个机组，可实时显示设备运行状况，方便操作；
- 16套以太网互联伺服系统和主操作系统完美融合，实现薄膜的平稳走料；
- 热封温度实现数字化控制，可根据主机运行线速度做出精准反馈；
- 所有电气系统和安装均采用北美标准。

Consisted of five interconnected machines and using the most advance high speed Omron PLC w/advance Ether Cad communication control to produce high speed and high quality products.

Production Line Machine including:

- Material Dispenser, Poly rope inserter, Double heads bag sealing machine, Triple folder and Overlapping winder.
- Advance HMI located all over the machine to provide real time status and information for friendly and ease of operation.
- Sixteen Ether Cad interconnected servo system are incorporated into the system to provide film flow smoothly during operation.
- Sealing temperature is digital control to provide accuracy feedback according to the line speed.
- All electrical system design and installation are according to North American Standard.

THREE SIDE SEAL BAG MACHINE

XA-600三边封制袋机

PE 复合 CPP / BOPP / PET / OPP / 纸 / 铝箔，制袋宽度 60-580 mm，厚度 60-200 微米，切断速度 200 次/分钟。3 伺服、4 伺服两种配置。

结构：

- 放卷部：双放卷 / 不停机换料 / K型或三角斗对折
- 纵封：纵封纵冷，可以选择一体型结构或者热冷分离
- 横封：通过加宽横梁多排弹簧结构实现高压低温
- 切袋集袋：双切刀 / CCD视觉辅助切刀 / 模切机构 / 自动理袋 / 自动质检并剔除

Three-side-seal pouches from laminated film, 60 to 580 mm wide, 60 to 200 micron, up to 200 cuts a minute. Three or four servo axes.

Main sections:

- Unwind: twin unwind / reel change without stopping / K-type or triangle former folding
- Longitudinal seal: sealed and cooled in line, as one unit or with the hot and cold stations separated
- Cross seal: a widened beam with several rows of springs, high pressure at low temperature
- Cutting and collecting: twin knives / CCD vision-assisted knife / die-cutting unit / automatic bag stacking / automatic inspection with reject

CENTRE SEAL / FOUR SIDE SEAL BAG MACHINE

XH-600中封/四边封制袋机

PE 复合 CPP / BOPP / PET / OPP / 纸 / 铝箔，做中封袋和四边封袋，制袋宽度 60-580 mm，厚度 60-200 微米，切断速度 120-200 次/分钟。3 伺服、4 伺服两种配置。

结构：

- 放卷：常规放卷结构，可定制
- 中封折页：将薄膜在中线处折页合并
- 纵封：常规纵封冷却结构
- 横封：通过加宽横梁多排弹簧结构实现高压低温
- 切袋集袋：双切刀 / CCD视觉辅助切刀 / 模切机构 / 自动理袋 / 自动质检并剔除

Centre-seal and four-side-seal pouches, 60 to 580 mm wide, 60 to 200 micron, 120 to 200 cuts a minute. Three or four servo axes.

Main sections:

- Unwind: standard unwind, can be built to order
- Centre folding: the film is folded and brought together on the centre line
- Longitudinal seal: the standard seal and cooling arrangement
- Cross seal: a widened beam with several rows of springs, high pressure at low temperature
- Cutting and collecting: twin knives / CCD vision-assisted knife / die-cutting unit / automatic bag stacking / automatic inspection with reject

STAND-UP ZIPPER / FOUR SIDE SEAL BAG MACHINE

XD-600立式拉链/四边封制袋机

8 伺服，做自立袋、拉链袋、三边封袋和四边封袋，制袋宽度 60-550 mm，厚度 60-200 微米，切断速度 120-200 次/分钟。

结构：

- 放卷部：双放卷 / 不停机换料 / K型或三角斗对折
- 纵封：纵封纵冷，可以选择一体型结构或者热冷分离
- 拉链安装：通过超声和热压来安装拉链
- 横封：通过加宽横梁多排弹簧结构实现高压低温
- 切袋集袋：双切刀 / CCD视觉辅助切刀 / 模切机构 / 自动理袋 / 自动质检并剔除

适用材料 Suitable Film	适用厚度 Suitable Thickness	切断速度 Cutting Speed	制袋宽度 Bag Making Width
CPP / BOPP PET / OPP	60-200 micron	120-200 cuts/min	60-550 mm

Stand-up, zipper, three-side-seal and four-side-seal pouches on eight servo axes. 60 to 550 mm wide, 60 to 200 micron, 120 to 200 cuts a minute.

Main sections:

- Unwind: twin unwind / reel change without stopping / K-type or triangle former folding
- Longitudinal seal: sealed and cooled in line, as one unit or with the hot and cold stations separated
- Zipper: applied by ultrasonic welding and heat press
- Cross seal: a widened beam with several rows of springs, high pressure at low temperature
- Cutting and collecting: twin knives / CCD vision-assisted knife / die-cutting unit / automatic bag stacking / automatic inspection with reject
